Made in Europe merchandising **is on the rise** and that's **great news!**

Dear Members of the Parliament,

At Dream Act Pro, we have always worked hand in hand with ethical French and European companies. During this period, it is more than ever important to us to help these companies which produce locally with an ethical mindset.

Local consumption is crucial for supporting local jobs, preserving expertise in the French and European industry and reducing the environmental impact of production (especially the carbon footprint linked to overseas transport).

With this catalogue, we take things one step further : an offer which is 100% ultra-local and ethical! Eco-friendly textiles, recycled stationery, zéro-waste planting kits, artisanal sweets that take us straight back to our childhood, recycled furniture, objects made out of eco-friendly wood....

This catalog brings together responsible media objects made in our regions. Pave the way, during your events and travels, at a time when Europe is committed to a more responsible economy and greater respect for the environment.

Enjoy !

Our mission

An increasing number of us have observed the harm done by mass consumption. But how to break away from it when alternatives are so hard to identify?

Eight years ago, Dream Act was created with this very goal in mind : to facilitate access to ethical and eco-friendly products.

Our mission? The democratization of ethical and transparent consumption, thanks to a unique marketplace gathering the creations of brands and artists. We promote virtuous manufacturing processes, to preserve our world and our children's after us.

Labelled

& Entreprise à Mission

Our commitments

An ethical and demanding charter, approved by a committee of independent experts, to guarantee the sustainable and ethical aspects of each product sold on Dream Act.

Products which are useful and respectful of society and the environment. We select products which have been thought out to preserve Humankind and Nature.

1% of profits made from your purchases can be donated to one of our partner charities of your choice.

6 points

to go greener

1 To be in tune with your commitments
 Be consistent with your commitments and those of the EU, and act accordingly: your media objects are strong vectors of brand image. Pick objects that reflect your values.

2 Carries a double message
 Through its story, the ethical merchandising object carries not only your message but also your values : respect of the environment if its raw material is eco-friendly ; support of local craftsmanship when the maker is locally based ; Fair Trade thanks to trustworthy global certifications

3 Stand out with your impact: mark people's memories
 Most merchandising objects are made in Asia with raw materials that are harmful for the environment. With ethical merchandising, you will stand out thanks to the uniqueness of your approach and will mark your target clientele's minds in the long run.

4 Meeting expectations of the European public
 87% of European people consider that ethical considerations are important in a media object. There are 85% who are sensitive to the environmental aspect and 74% that support European manufacturing*.

5 Choosing "made in France/Europe": fast delivery, global impact
 A made in France or Europe object has a global impact:

- fastest delivery time
- reduced carbon footprint
- support to local businesses

6 Higher quality for longer-lasting and better-perceived objects
 When it is deemed useful, 69% of French people keep their merchandising*. An eco-friendly object will be useful and sustainable because it is made with raw materials that have been chosen for their quality and resistance. This will make you stand out from the opposition and their poor-quality goodies.

*CSA for 2FPCO, 2020

Discover our impacts

Biodiversity

Initiative which works to sustain biodiversity.

Education

Initiative which makes education accessible to all.

No-Waste

Initiative that works for the reduction of waste in companies.
